

Green Belt Study– South Staffordshire

Harm Assessment

S56 Moderate - High

S57 Low

S58 Low

S59 Moderate - High

Moderate – High Where land makes a moderate contribution to one of the Green Belt purposes and a weak contribution to the others, but where its release would significantly weaken the adjacent Green Belt (for example by isolating an area of Green Belt that makes a stronger contribution), harm is likely to be moderate-high.

Low Where land makes a relatively weak contribution to one of the Green Belt purposes and a weak contribution to the others, and its release would not weaken the Green Belt boundary or the integrity of adjacent Green Belt land, harm is likely to be low.
